

AMENDMENTS TO THE SPECIFICATION:

Please replace Abstract as follows.

--A buffering protective handheld controller, mainly with a buffering protective configuration for direction buttons and a number of functional buttons on one side of the main unit. It composes a multi-layer cushion as a protective mechanism. Further, the handheld main unit has the rigid plastic base in an appropriate hollow shape, which may be enclosed by a sticking soft pad with a proper size. Thus, it can provide a cushion air-bag effect and fits the user's palm in any shape and any size. Particularly, because the user can hold the unit with a firm grasp by fingers, the grasping force is minimized during use. Such a handheld controller not only has the most comfortability but also reduced holding pressure. Therefore,~~the invention~~it can provide fatigue reduction, blistering prevention and benefits like finger protection from callus and deformation.--
